PROJECTS ON PYTHON

Turtle:

- ❖ **Snake Game:**
    - ▪ By using turtle & Random module, when user presser the arrow buttons snake move accordingly.
    - ▪ When the snake collides with dot (food) it snake extends by 1box (1 turtle) & when collides with walls of screen or own tail then Game will over.
    - ▪ User score is displayed & if score crossed the High score the High score is saved in text file.

- ❖ **Pongo Game:**
  - ▪ This game with two moving balls & with two sliders & requires two Players
  - ▪ Arrow keys will be used by 1 player & (W, A, S, D) keys are used by another player.

- ❖ **Turtle Crossing Game:**
  - ▪ In this game random number of cars will be generated and turtle moves forward when user presses the UP key button.
  - ▪ If the turtle collides with car game will get over.
  - ▪ If turtle crossed the road, the Speed of the cars increases, The scored is increased by 1 & turtle returns to its original position.

Tkinter:

- ❖ US states names Guessing Game:
  This game shows this map of US using Tkinter module , takes the Country name as input & if the user guessed the correct country name it displays the name of state on map using turtle module

Based on API:

- ❖ Stock News:

  This projects uses the API Endpoint https://www.alphavantage.co/query and News API Endpoint https://newsapi.org/v2/everything

  Checks the stock rate of set Company name and compares the yesterday close price & today's opening price, if price falls or raises above 5 %, then it sends SMS alert using https://www.twilio.com/
